

SMART CARE HOMES
By Wixalia

DIGITAL AT THE SERVICE OF NURSING HOMES

- Digital upgrade
- Renovation of equipment
- Digital transformation

Because digital is no longer an alternative, Wixalia supports you in building the connected facility you need. We help you to think about your project, **for an intelligent and relevant digital.**

The question is **which connectivity for which digital tools?**

INTERNET AND WIFI

Before embarking on setting up digital tools, let's take a look at your network and your WiFi installations, and adapt them to your uses.

What can Wixalia do for you?

INTERNET

- Search for the best interconnection solution available in your region
- Management of internet links
- Guarantees of continuity of service

WIFI

- Coverage audit and analysis
- Setting up a multi-user wifi network: professional, residents and visitors.
- Sizing the network for your purposes
- Network security and management of connected objects and devices
- Maintenance and supervision, managed wifi
- Green WiFi program: 1 wifi acces point installed - 1 tree planted

EQUIPMENT

- Is your installation obsolete, or no longer suited to your needs? Consult us for a recovery of your equipment.

THINK WIFI-AS-SERVICE

This subscription plan is a real opportunity to modernize your facilities. It's a no-surprise model, based on an all-inclusive monthly room price: equipment, installation and services.

- No need for initial investment
- Expenses are adapted to the resources consumed
- The model is flexible and evolving at the pace of your organization
- Zero operational concerns: update, maintenance, supervision, monitoring, everything is included in the package.

DIGITAL AT THE SERVICE OF **NURSING HOMES**

Let's develop digital services to sustainably improve the well-being of your residents, maintain social ties and simplify the daily lives of your staff

Wi-see

Plan, organize and ensure the follow-up of visits on site or by videoconference

Wi-gym

Stimulate cognitive activity in a fun and monitored way

Wi-connect

Maintain the social link and inform in all circumstances

Wi-care

Improve medical care for residents through remote monitoring

Wixalink

Wixalink is a modular digital solution.

Its goals :

Simplify the organization of visits. The staff can thus devote themselves primarily to their mission with the residents.

Maintain contact with the outside world through video conferencing and communication through a private social network suitable for the elderly.

Anticipate geriatric failure to thrive. Accessible cognitive stimulation options can prevent this from happening.

Improve medical care through remote monitoring and continuous exchange between residents and their doctors.

THE RIGHT CONNECTED TOOLS FOR CARE

Each establishment has its uses and needs.
What are yours?

Wixalia helps you to sort through the many solutions available on the market, **for a practical digital**, and above all to integrate them into your network and secure them.

- Tablets
- Smart TV / IPTV
- Telemedicine carts
- Home automation
- Fall detection solutions
- Access control, anti-wandering and anti-fugue systems
- Multimedia entertainment
- Etc.

ON THE WAY TO YOUR CONNECTED FACILITY?

Let's talk about your project.
