

Digital services for well-being in nursing homes

The solution

Wixalia created **Wixalink** in a desire to provide facilities with a practical response to daily needs, easy to deploy and use.

Wixalink is a suite of 4 digital applications adapted to the challenges of the healthcare sector, in particular nursing homes.

Its objective is simple : it is designed to sustainably improve the well-being of your residents and simplify the daily life of your staff.

Wi-see

Plan, organize and ensure the follow-up of visits, on site or in video-conference.

Wi-gym

Stimulate cognitive activity in a fun and monitored way

Wi-connect

Maintain the social link and inform in all circumstances

Wi-care

Improve medical care for residents through remote monitoring

Wi-see

Plan, organize and ensure the follow-up of visits

Thanks to **Wi-see**, your residents can receive their loved ones in complete serenity. And for your staff, it's a release: of time and energy.

Actually **Wi-see** is an agenda interfaced with a video-conference application.

Simple and smart.

The facility sets the framework for visits. And the families make an appointment online on a secure booking portal.

With **Wi-see**, everything is easy :

- Set visit schedules
- Organize on-site or video-conference visits
- Ensure that your visit protocols are followed
- And keep track of visits

Wi-connect

Maintain social ties with families and inform in all circumstances

Wi-connect is a private social network dedicated to your institution.

It promotes your activities as well as the quality of your services, and animates the social life of your residences:

- Families are informed of current events and follow the daily life of their loved one.
- Families and the community of the care home can interact and exchange through secure messaging.
- And the platform allows the publication of a "gazette", fed by the publications of the social network.

Wi-gym

Stimulate cognitive activity in a fun and monitored way

Wi-gym is a "smart" and progressive app of fun and intuitive exercises.

- Residents can exercise their memory and strengthen their cognitive abilities.
- Its tracking module records successive sessions. It allows you to follow the evolution of any progression.

Wi-gym is an ideal complement to traditional cognitive therapies. And it is a powerful tool to accompany our seniors on the path of their psycho-emotional health.

Wi-care

Improve the medical care of resident

Wi-care is a remote monitoring platform that guarantees the continuity of the care process, thanks to a continuous and secure exchange between health professionals and residents.

- Remote management of chronic diseases and pathologies requiring regular monitoring
- Connection of medical IoTs needed for tele-monitoring
- Complete coordination of the care pathway
- Optimization of the organization by anticipating schedules
- Support for patients through therapeutic education and teleconsultation.

Wi-care is secure in compliance with the GDPR, and certified Class I medical device
