

VitalTrack®

TRACEABILITY AND
GEOLOCATION SOLUTION

BY  **E3 CORTEX**

Real-time Temperature
and Geolocation

Personalised access for
each user

Possible alert
if the temperature
exceeds a set level*

Alerts users before the
arrival of the package

A dedicated interface,
a secure server, easy and
fast use of online tracking

Device rental with
a short commitment
period [1 month minimum]

Waterproof IP65 enclosure
& Energy-efficient batter

* Option not suitable for organ transport

Geolocation accuracy

→ The latest GPS technologies used in our geo-tagged temperature trackers go far beyond traditional point-to-point tracking solutions with an accuracy of less than 20m in open areas.

Temperature accuracy

→ By wire probe with the possibility of COFRAC certification.

Sending data in real time

→ Transmission of data or alerts by e-mail to pre-programmed recipients or senders.

Management of entrance and exit limits (geofencing)

→ Alerts users before the arrival of the package programmable to the nearest kilometre.

→ Record of journeys, making it possible to know precisely when the transport of the goods has been split over stages.

No need for an app (web service)

→ Dedicated interface, several alerts available, such as: temperature thresholds exceeded, remaining battery life, entries and/or exits of geofencing area.

→ Personalised access for each user with user rights management..

Ergonomics of the interface

→ Summary dashboard of alerts that can be sent by email to one or more recipients.

→ Customisable dashboard with mapping.

→ Data display by widget (temperature, battery level, alerts...).

→ Setting the information transmission frequency (5 min / 15 min / 30 min).
